

Pohjola Rakennus Oy Suomi

WE CREATE NEW COMFORT ZONES

About Us

- Pohjola Rakennus Oy Suomi was founded in 1989 and is a steadily growing Finnish family-owned development and construction company.
- We are one of Finland's largest construction companies and are known for our strong regional planning expertise and project development. Our main focus is on the construction of apartment buildings, with more than 30 years of experience.
- We design and build more than 4000 new homes each year in good locations and with functional floor plans and quality materials.
- We operate in six cities in Finland:
 - Helsinki
 - Tampere
 - Turku
 - Jyväskylä
 - Kuopio
 - Oulu
- Currently we employ approx. 300 people.

Climate change mitigation
- Preserving biodiversity
- Controlled use of natural resources/Efficient resource management

- Financially profitable business operations
- Employment effects
- Fair and open competition
- The tax imprint
- Prevention of the grey economy and corruption

Corporate responsibility

- Pohjola Rakennus is a Finnish family-owned company, meaning long-term ownership and sustainable growth in line with the company's values. Pohjola Rakennus Group builds homes with respect for residents and the environment. The company's Board of Directors and Management Team steer and monitor the responsibility work. Corporate responsibility is divided into three areas: good governance, social responsibility and environmental responsibility.

Good governance

- Pohjola Rakennus follows good corporate governance practices in all its operations. The company's operations are guided by, among other things, the ownership strategy, updated annually in connection with the company's strategy process, and ethical guidelines.
- The highest governing bodies are the Annual General Meeting and the Board of Directors, as well as the President and CEO. The Chairman of the Board prepares matters to be decided by the Board of Directors with their personnel. The Chairman of the Board is responsible for implementing the goals, plans, policies and objectives set by the Board in the Group.

Social responsibility

- Pohjola Rakennus's goal is to offer its employees an inspiring, fair, safe and equal work environment. With regard to accidents at work, the goal is zero.
- The company requires that its partners, subsuppliers and subcontractors commit to complying with the Group's ethical guidelines. The company requires employees, subcontractors and partners, as well as their employees, to wear the necessary protective equipment and a photo ID on construction sites.
- The company's purpose is to engage in financially stable, profitable and responsible construction activities in the long term. The goal is profitable, moderate growth, i.e., sustainable growth that creates value for the owners now and in the future.
- Pohjola Rakennus Corporation actively maintains financier relations in order to act as a reliable and interactive partner and to secure the financing of the Corporation's operations on market terms in both the short and long term.

Environmental sustainability

- The environmental programme of Pohjola Rakennus includes the company's most significant environmental aspects and goals. Based on these, the company sets environmental goals and measures to achieve these goals. The objective of the environmental programme is to develop the company's operations to be more environmentally friendly and support sustainable development.
- By taking environmental considerations and social responsibility into account, we aim to be involved in preventing climate change and promoting the preservation of a diverse environment. The environmental programme's starting point is the commitment to complying with the legislation and the continuous development of operations. Pohjola Rakennus requires its subcontractors and partners to comply with the prepared environmental programme. In addition to the programme, our operations are also guided by the company's ethical guidelines.

Pohjola in Figures

Key Figures 31.12.2021

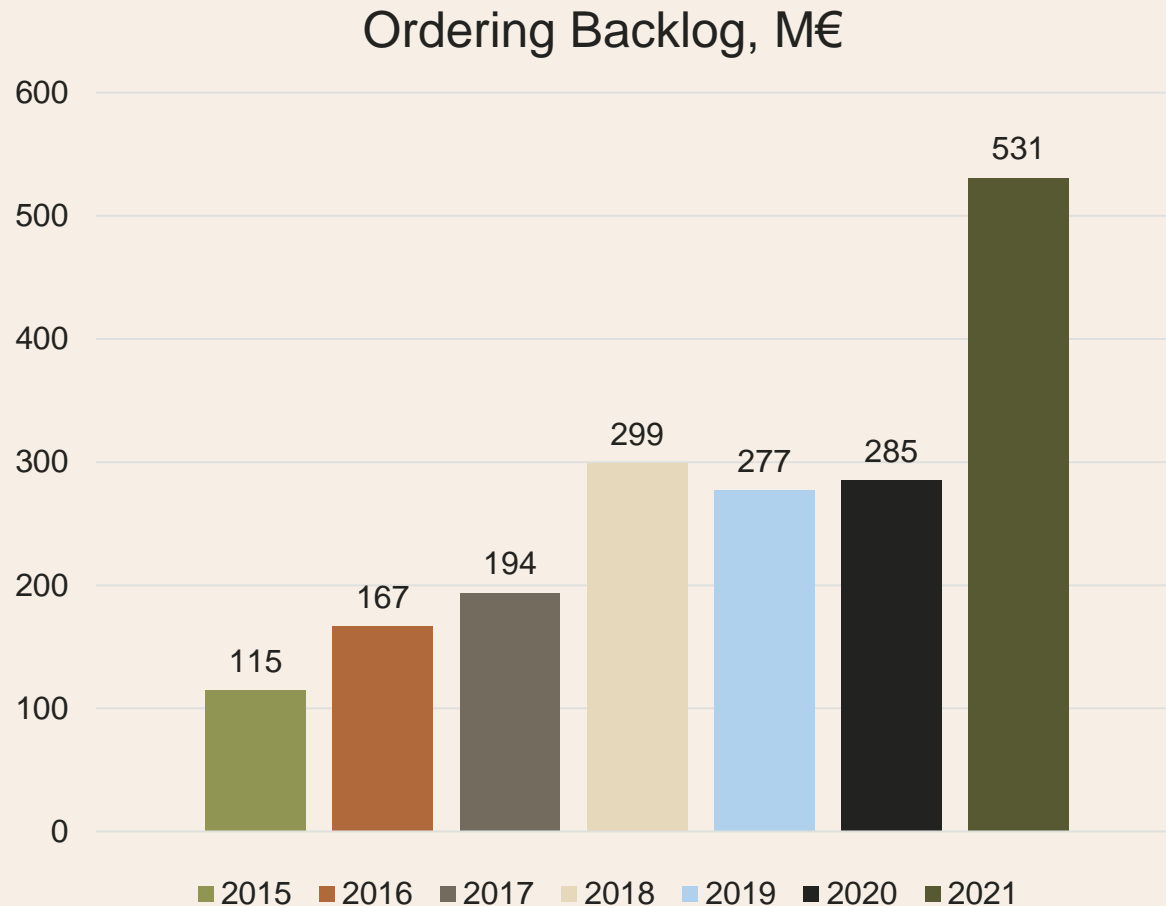

Turnover, M€

Operating Profit, M€

Key Figures 31.12.2021

- 80% of our production is self-developed apartment building construction.
- Our order backlog is at a very good level.
- We have 600,000 sqm of plots with a secured land use planning or under zoning.
- Our plot reserve enables the construction of approximately 130,000 m² of floor area per year.

References

Mahtinokka
